Name of Conservation Issue

PHOTO

Possible caption describing picture or graphic.

Describe the conservation issue:

When readers open the brochure, this is the first text they will see, making this a good place to summarize your conservation issue.

Make this text compelling and interesting so that readers will want to read the rest of the brochure.

Why should we care about this issue?

Explain to the reader what is important about this issue. Why is this issue so important to our environment today? Why should the reader be concerned?

PHOTO

Possible caption describing picture or graphic.

What effects does this conservation issue have on the hydrosphere in relation to another system(s)?

Describe to the reader how this conservation issue is affecting these systems.

How do humans contribute to this conservation issue?

Explain to the reader what humans are doing to create or add to this conservation issue. Be sure NOT to give away any of the solutions here; that will be in its own section.
