

Kindergarten – Pushes & Pulls

1. Play with some toys!

Try to find at least one of each of these toys:

- A toy with wheels
- A toy with a string
- A round toy
- A square toy
- A toy that rolls
- A stuffed toy

Play with each toy.

Does the toy move when you play with it?

Sort the toys into two groups:

Things that move	Things that don't move

2. Moving things

Do these toys move with a PUSH or a PULL?

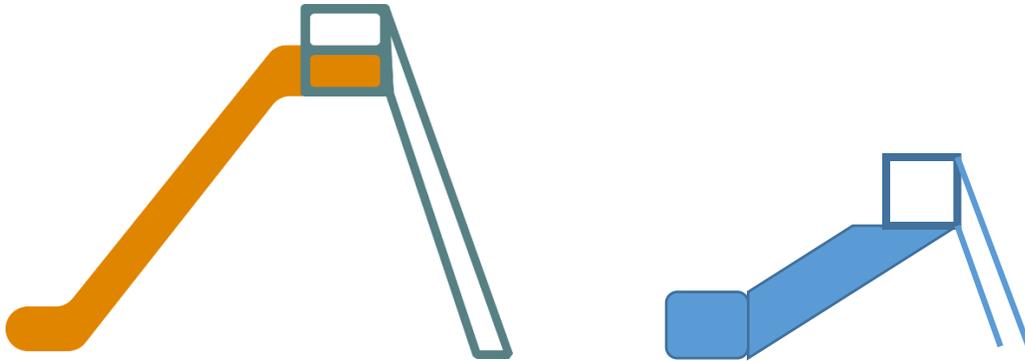

3. Rolling down a Ramp!

Have you ever seen a slide? A slide is a RAMP.

- a. See the slides below? If a ball rolled down each slide, which ball would go the farthest? Why do you think so?

- b. Can you make a ramp where you live? Try this out! Make a ramp that is high and make a ramp that is low. Roll a ball down the ramp. Which ball moves the farthest?

4. Play ball!

Have you ever played with a ball? If you bounce it against something, what happens? Does it always do the same thing? Play with a ball and see if you can make it bounce in different ways!
